

Hydraulic Control Unit

The **Hydraulic Control Unit** is designed to provide all the hydraulic control function required for well intervention operations by a reliable air supply. The defining characteristic of Portable Control Unit is its mobility and ease of handling. Free of the restrictions of larger units, this Hydraulic Control Unit can be move around at any time to specific areas.

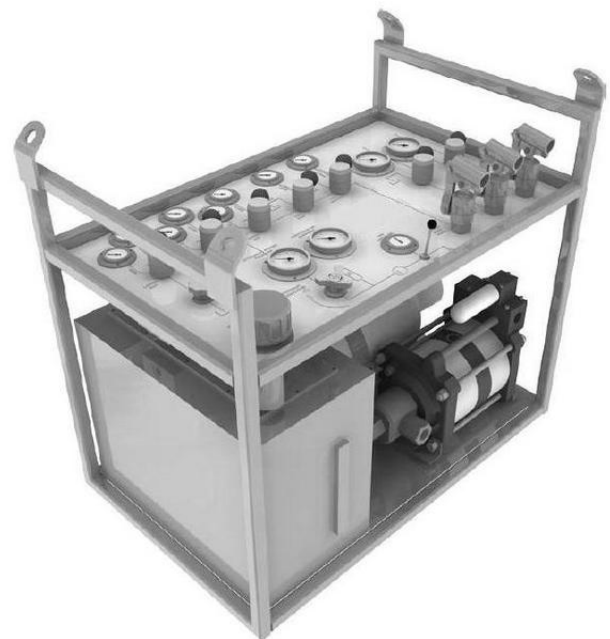

The Hydraulic Control Unit is fitted with an Control Panel that demonstrates the fluid circuits and is constructed from precision laser cut stainless steel, engraved and infilled with diagram of the circuits. This assists the operator to identify the circuits and associated valves quickly, therefore assisting in the reduction of control input errors.

This Hydraulic Control Unit offers a flexible, lightweight and cost-effective means of controlling various combinations of Pressure Control Equipment. It particularly useful for Slickline operation or the operating within a specific area for a shorter time-period.

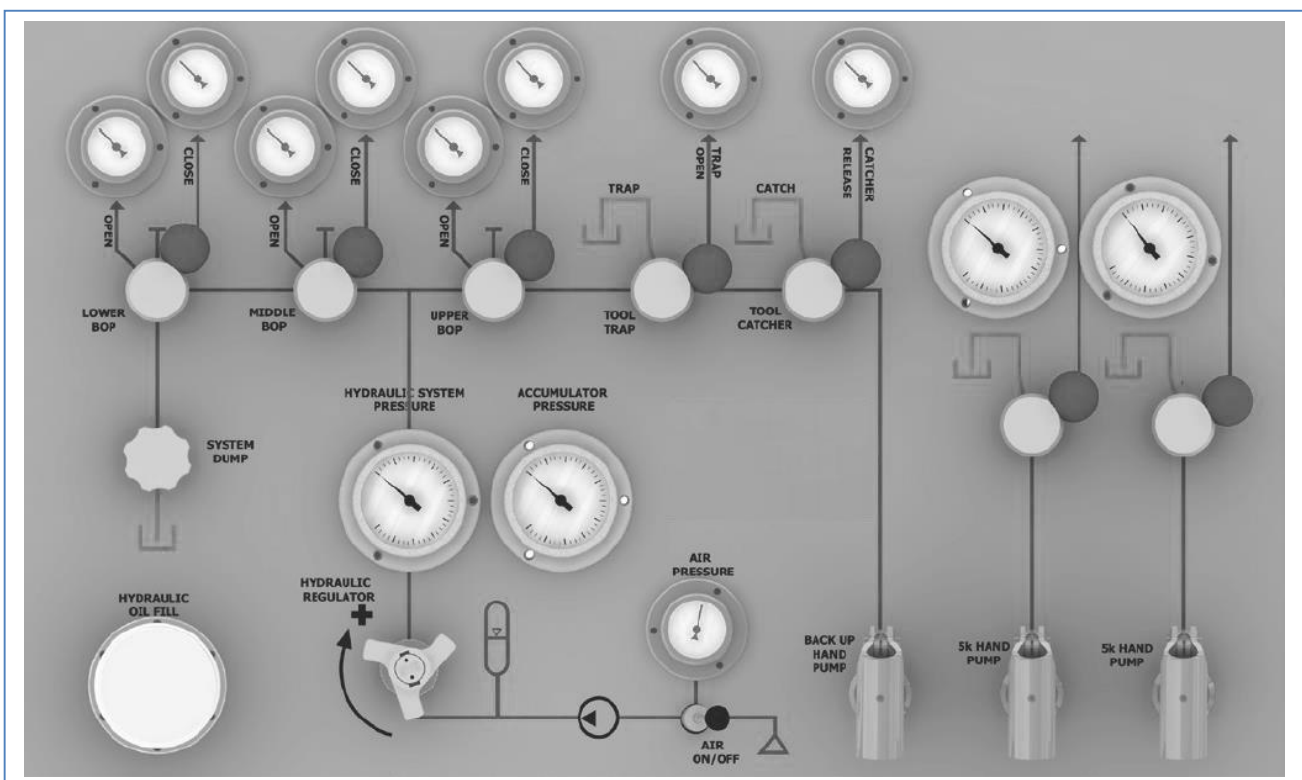

Feature

- 1) Stainless Steel Construction;
- 2) Are driven Hydraulic Pump ;
- 3) High quality valves, gauges and fittings;
- 4) 20L reservoir, 10L accumulator;
- 5) Compact size and cost-effective;

Main Parameter

- 1) Part List of the Pressure Control Equipment
- 2) Quantity of hydraulic targets
- 3) Quick Joint type and size of each targets
- 4) Working Pressure
- 5) Service Temperature

Typical Panels

- Stuffing Box
- Tool Catcher
- Tool Trap
- BOP 1
- BOP 2
- BOP 3

Note: More size available on request.

Normal Guarantee Period

12 months after the clients received the Equipment
or 13 months after the commodity be shipped from Chinese Harbor.

Grease and Hydraulic Control Module for Wireline PCE

Information Required When Inquiry

If you will purchase the whole Slickline PCE,
please refer to the [Information Required When Inquiry](#) in Chapter 《Slickline PCE》 .

If you purchase the Hydraulic Control Unit separately, the **Main Parameter** information above mentioned will be asked.
