

## R Pulling Tool

**R Pulling Tool** is a Wireline Pulling Tool designed to engage an external type fishing neck. The tool is offered in wide range of sizes, with three reaches in each size.

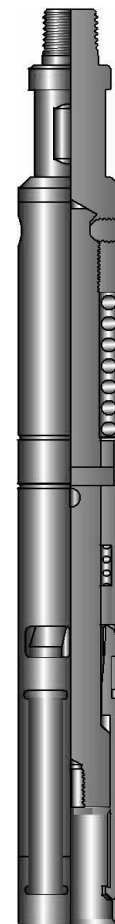

- RB: with Short Reaches
- RS: with Medium Reaches
- RJ: with Longest Reaches

The R Pulling Tool is designed to be released from the downhole device by upward jarring. It is particularly suited for retrieving devices which are unlocked by downward jarring.

RB Pulling Tools					
Size	Actual. OD	To Engage Size	Reach	F/N OD	Connection
(in.)	(in.)	(in.)	(in.)	(in.)	(in. TPI)
