

Go-devil

Go-devil are used in wireline fishing operations when wireline is required to be cut. Go-devil is constructed of a solid length of bar with a slot and guide plate through which the wireline is passed. The tool is then dropped downhole in the conventional manner. Go-devils look similar to Wireline Stem and has a longitudinal slot on body with a metallic strip pinned within slot, to prevent wireline from coming out.

There are Flat Bottom and Angled Bottom for selective.

Go-devils			
Size	Actual. OD	F/N OD	Length
(in.)	(in.)	(in.)	(ft.)
1-1/2	1.500	1.375	2ft, 3ft, 5ft
1-7/8	1.875	1.750	2ft, 3ft, 5ft
2-1/8	2.125	1.750	2ft, 3ft, 5ft
2-1/2	2.500	2.313	2ft, 3ft, 5ft

Other sizes available on request.
